Clinically proven to improve*:

Hydration

Luminosity

Flakiness

No adverse events.

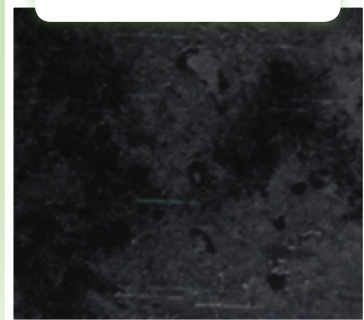

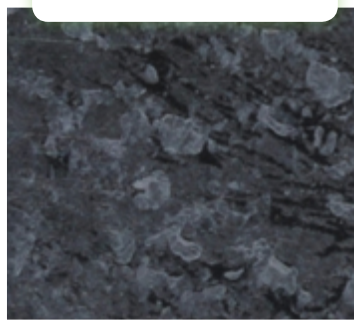

Actual photos of study subject.

Day 1

Day 14

D-SQUAME discs from a study subject.

Clinically proven to be nonirritating.†

No adverse events.

*Desquamation and moisturization were studied on twice-a-day application of AmLactin® Rapid Relief in a randomized, single-center, controlled, evaluator-blinded, within-subject comparison study vs no treatment for 14 days.

†All 4 AmLactin® products were compared with a nonirritating control during a randomized, single-center, evaluator-blinded, within-subject, irritation and tolerability study, and demonstrated no significant signs of irritation over a period of 22 days.

SUNBURN ALERT: This product contains an alpha-hydroxy acid (AHA) that may increase your skin's sensitivity to sunburn. Be sun smart: Use sunscreen, wear protective clothing, and limit sun exposure while using this product and for a week afterward.

AmLactin®

Clinically proven to reduce dryness and scaling with sustained results after daily use.[‡]

No subjects discontinued study due to AEs.[§]

With AmLactin[®]

1 application

reduced drying and scaling

Significant improvement after

1 day of use

and sustained through 1 WEEK and 1 MONTH of daily use^{||}

2x

Doubled corneometer readings in less than a month

MORE
THAN A MOISTURIZER

Our therapeutic formulas contain beneficial levels of lactic acid, which gently exfoliates plus deeply hydrates to relieve your patients' rough, dry skin.

[‡]50 patients with moderate to severe dry skin applied AmLactin[®] Rapid Relief twice a day in a 4-week, single-center, open-label, in-use, cosmetic, clinical, skin-barrier and conductance study.

[§]7 AEs were reported, no suspected relationship with the product.

^{||}Statistically significant improvement in skin hydration was observed at all time points ($P < 0.0001$) compared with Day 1.
